

2009 *Transpacific Yacht Race* NOTICE OF RACE

Third Amendment to the Notice of Race

The Notice of Race is hereby amended as follows:

Delete Paragraph 14.4 and replace with:

14.4 The deadline for submitting final rating data to US Sailing is shown in *NOR 8.0 and 4.4.1*. The receipt of this final data must be acknowledged by US Sailing. Any yacht failing to submit final rating data by the deadline *may* be penalized ten (10) minutes of elapsed time for every business day the final rating data is late past the deadline. The Measurer Verified sail measurements (14.3 B) may be declared and submitted in advance of measuring the sails provided prior to June 22, 2009; once built, the measurer must acknowledge to US Sailing receipt of sail certificates confirming that no sail exceeds the declared measurements. Any yacht that suffers a documented failure, defined as a catastrophic gear failure or a requirement for correction of documented margin of safety issues, requiring submittal of new rating data after the rating submittal deadline may petition the Transpac Board for a waiver of penalty, provided that for other than the documented failure, she would have in all respects been able to comply with the dates specified in this paragraph. Should the Board grant a waiver of penalty the yacht must submit all rating data not affected by the documented failure and the anticipated affected rating data prior to the new rating submittal deadline such that an experimental certificate can be issued.

Delete Paragraph 17.1 and replace with:

17.1 Yachts must be equipped with a VHF-FM radio transceiver of at least 25 watts of power and a single-side band synthesized transceiver of at least 100 watts PEP. The VHF antenna must be mounted atop the main mast. *The SSB antenna must be permanently installed but may include a detachable link for yachts with no standing backstay.* As a minimal requirement, the following frequencies are: VHF Channels 6, 16, 68, and 71; SSB frequencies: 2096.5, 2182, 4146.0 (4A), 8294.0 (8A); USCG (816) (transmit 8240.0 and receive 8764.0).

Delete Paragraph 26.0 and replace with:
